EXPERIENCE

Lead Front End Developer

Institute of Electrical and Electronics Engineers - March 2021 - Present

- Developed responsive cross-browser and multi-browser web pages using HTML, JavaScript, CSS which resulted in **16%** more clicks from users.

- Enhanced User Experience by coding carousels and drop down menus using JavaScript, which led to a **13%** increase in the user's time on page.

- Debugged the website using Chrome Developer tools.

Front End Developer

A1 Personal Training - August 2020 - March 2021

- Coded a multi-page, responsive website that averages 50 page views a day.

- Boosted SEO score **29%** by implementing a responsive design and compressing media on the website.

- Actively managed the website and regularly added new pages or changed design based on stakeholder requirements.

Full Stack Developer

Sigma Pi Fraternity - January 2020 - August 2020

- Programmed a responsive, RESTful web app for alumni and active brothers in my fraternity using Node.JS, HTML, CSS and MongoDB.

- Utilized bcrypt.js and Passport.js to ensure the web app reflected OAuth security standards.

- Actively managed the database which grew to over 100 users.
